## Abstracts

Bisphenol A is used in the manufacture of polycarbonate plastics and epoxies that are essential for a variety of consumer and industrial products, including many important applications related to public health and food safety.

### SCOPE OF THE REPORT:

This report focuses on the Bisphenol in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Products made from bisphenol A meet high performance requirements. The epoxy resin made of bisphenol A is hard and easily adheres to the metal surface, making it an excellent protective coating material. Polycarbonate plastics made from bisphenol A are not easily broken, light weight, and have a high optical transparency similar to glass.

The worldwide market for Bisphenol is expected to grow at a CAGR of roughly 3.3% over the next five years, will reach 17700 million US\$ in 2023, from 14500 million US\$ in 2017, according to a new GIR (Global Info Research) study.
