Abstracts

The global Bitumen Membrane Sheet market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Bitumen consists of various drawbacks as the production of petroleum products is leading to environmental degradation. Various organizations are now calling to reduce the production of petroleum products and switch to more eco-friendly alternatives. One such development is the introduction of innovative technologies to produce bio-bitumen, based on lignin, which is one of the co-products produced from compressed bio-gas plants, second-generation ethanol plants, and also from paper making. The conversion of crude lignin to bio-bitumen helps to replace fossil-based bitumen and can introduce eco-friendly bitumen.

This report studies the global Bitumen Membrane Sheet production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Bitumen Membrane Sheet, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
