Black Cohosh Powder is produced by micronizing the dried rhizomes of *Actaea racemosa* (formerly *Cimicifuga racemosa*), a Ranunculaceae family plant, serving as a key material in both traditional herbalism and modern supplements. Native to eastern North American forests, its bioactive compounds—including triterpene glycosides (e.g., actein), phenolic acids, and phytoestrogenic substances—are particularly renowned in women's health. The light brown powder with a mildly bitter taste is commonly used to alleviate menopausal symptoms (hot flashes, night sweats, mood swings), regulate menstrual cycles, and potentially support bone health. It can be encapsulated as supplements or blended into women's functional teas.
