Abstracts

A bladder scanner is a medical device that utilizes ultrasound to noninvasively measure the amount of urine in the bladder or to determine how much urine remains in the bladder after urination as a way to measure residual levels. The type of scanner is a niche ultrasound system that provides fast and reliable information to aid in the diagnosis and treatment of urological conditions, access urinary retention, prevents unnecessary catheterization and reduces incidents of urinary tract infections (UTIs).

Scope of the Report:

This report focuses on the Bladder Scanners in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
