Abstracts

In the past year, blockchain has become a controversial global phenomenon, with the technology perceived as either a solution for whatever ails society or "rat poison squared" as Warren Buffet describes Bitcoin. In 2018, we are witnessing the launch of blockchains carrying commercial traffic and moving beyond proof-of-concept (PoC) demonstrations, though the selected applications have yet to demonstrate the capacity and scale of credit card networks. Blockchain-powered international trade finance coming online is just one example. The blockchain ecosystem is replete with innovating startups prompted by amazing cryptocurrency valuations. Blockchain entrepreneurs find a reason to tokenize anything and everything and move quickly toward an initial coin offering (ICO), the largest of which recently exceeded \$4 billion, though funds were denominated in another cryptocurrency, Ethereum.

Scope of the Report:

The explosion in the blockchain ecosystem is typical during the early stages of general-purpose technology (GPT) development and explains the degree of fragmentation present in the market. This fragmentation leads to cautious investment as the industry works through the inevitable industry rationalization and resulting consolidation. Driving this rationalization are the large internet companies moving to establish market dominance as blockchain platforms and reap the resulting rewards. The large company blockchain development encourages other large companies to move beyond PoCs to commercial traffic. Tractica has identified six broad enterprise blockchain use case categories that are further segmented into 29 individual use cases. These use cases offer cost savings, efficiency improvements, security enhancement, and regulatory compliance compared to legacy processes.

The global Blockchain for Enterprise Applications market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.
