Abstracts

According to our (Global Info Research) latest study, the global Blockchain Accelerators market size was valued at US\$ 3715 million in 2025 and is forecast to a readjusted size of US\$ 12107 million by 2032 with a CAGR of 18.4% during review period.

In 2025, global Blockchain Accelerator output reached about 20 million units and global capacity of around 24 million units. The average price is about USD 180 per unit, with gross margins near 52%. Blockchain Accelerators are specialized hardware or integrated computing platforms designed to accelerate blockchain-related workloads such as cryptographic hashing, consensus processing, smart contract execution, zero-knowledge proof computation, transaction validation, and decentralized data processing. These accelerators are widely used in cryptocurrency mining, Web3 infrastructure, decentralized finance (DeFi), blockchain security, and enterprise distributed ledger systems to improve throughput, energy efficiency, and latency compared with general-purpose CPUs. The supply chain of Blockchain Accelerators starts with upstream suppliers of semiconductor wafers, advanced packaging materials, memory chips, power management ICs, and IP core providers for cryptography and AI computing. Midstream activities involve chip architecture design, ASIC/FPGA/GPU manufacturing, semiconductor fabrication, packaging and testing, firmware development, and system integration by accelerator manufacturers and server providers. Downstream sectors include cryptocurrency mining farms, cloud blockchain infrastructure providers, financial institutions, Web3 platforms, decentralized applications (dApps), cybersecurity companies, data centers, and enterprise blockchain solution providers across industries such as finance, supply chain logistics, healthcare, gaming, and digital identity management.
