Abstracts

According to our latest research, the global Blockchain Finance market size will reach USD 120610 million in 2030, growing at a CAGR of 33.2% over the analysis period.

Block chain finance is the application of block chain technology in the financial field. Financial services industry is the driving force of global economic development, and is also one of the most centralization industries. The asymmetric information between the two parties in the financial market leads to the failure to establish an effective credit mechanism. There are a large number of central credit intermediaries and information intermediaries in the industrial chain, which slows the efficiency of the system and increases the cost of funds. The open and no tampering properties of block chain technology provide the possibility for the centralization of the trust mechanism, and have the potential to change the financial infrastructure. All kinds of financial assets, such as equity, bond, bill, warehouse receipt and fund share, can be integrated into the block chain books, and become the digital assets of the chain, in the block chain. Store, transfer, and trade. It has a broad prospect of application in the financial field. For example, it has a typical application in cross-border payment, insurance claims, securities trading, bills and so on. Other segments include Proof of equity and exchange stock exchange?Financial audit?loyalty and rewards.
