Abstracts

The global Blood Bank (Blood Banking) market size is expected to reach \$ 36010 million by 2032, rising at a market growth of 6.5% CAGR during the forecast period (2026-2032).

A blood bank is a center where blood gathered as a result of blood donation is stored and preserved for later use in blood transfusion. The term 'blood bank' typically refers to a division of a hospital where the storage of blood product occurs and where proper testing is performed (to reduce the risk of transfusion related adverse events). However, it sometimes refers to a collection center, and indeed some hospitals also perform collection.

A key driver in the blood bank market is the increasing number of trauma cases and the rising demand for blood transfusions in surgeries and emergency care. Advances in healthcare infrastructure, particularly in developing countries, have led to a growing need for a reliable supply of blood. Furthermore, government initiatives promoting voluntary blood donation and improved awareness about the importance of blood donation are significantly boosting the availability of blood, fueling the growth of the blood bank market.

A major challenge in the blood bank market is the issue of maintaining an adequate and safe blood supply. Seasonal fluctuations in donation rates, along with the short shelf life of blood components like platelets, often result in supply shortages. Moreover, the risk of blood-borne infections and the high cost of testing, storage, and ensuring compliance with regulatory standards further complicate the efficient management of blood banks, especially in resource-limited settings.

North America is the largest consumption place, with a consumption market share more than 35%, It was followed by Europe with 25%.

This report studies the global Blood Bank (Blood Banking) demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Blood Bank (Blood Banking), and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Blood Bank (Blood Banking) that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Blood Bank (Blood Banking) total market, 2021-2032, (USD Million)

Global Blood Bank (Blood Banking) total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Blood Bank (Blood Banking) total market, key domestic companies, and share, (USD Million)

Global Blood Bank (Blood Banking) revenue by player, revenue and market share 2021-2026, (USD Million)

Global Blood Bank (Blood Banking) total market by Type, CAGR, 2021-2032, (USD Million)

Global Blood Bank (Blood Banking) total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Blood Bank (Blood Banking) market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include America's Blood Centers, Japan Red Cross Society, American Red Cross, Australia Red Cross, Red Cross Society of China, NHS Blood and Transplant, New York Blood Center, Canadian Blood Services, Sanquin Blood Supply Foundation, Blood Bank of Alaska, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Blood Bank (Blood Banking) market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
