The global Blood Pressure Monitor with ECG market size is expected to reach \$ 537 million by 2032, rising at a market growth of 7.1% CAGR during the forecast period (2026-2032).

A Blood Pressure Monitor with ECG (Electrocardiogram) is a medical device designed to measure both blood pressure and perform an electrocardiogram at the same time. This integrated device allows users to not only monitor their systolic and diastolic blood pressure (indicators of hypertension or hypotension) but also record the electrical activity of their heart, which can be used to assess cardiac health and detect potential rhythm irregularities.

In 2025, global Blood Pressure Monitor with ECG sales reached 2,097 K Units, with an average global market price of around 145.5 USD/Unit. Production capacity reached 3,000 K Units, with a gross profit margin of approximately 30%.

Global Blood Pressure Monitor with ECG key players include OMRON Healthcare, Lepu Medical, Beurer, Philips and Withings, etc. Global top five manufacturers hold a share over 90%.

The largest market is Europe, has a share over 32%, followed by APAC and United States, with around 18% and 20% market share respectively.

In terms of product, Home Use is the largest segment, with a share over 85%. And in terms of application, the largest application is Online Sales, has a share about 75%, followed by Offline Sales.

With the development of AI technology, such devices will become more intelligent, not

only able to automatically analyze data and provide health advice, but also seamlessly connect with smartphones, smart wearable devices, home health management systems and even telemedicine services. Through cloud services, users can easily share data with doctors to achieve remote monitoring and health management. On the basis of blood pressure monitoring + electrocardiogram function, more health monitoring functions are integrated to form a comprehensive health monitoring solution to meet the integration needs of customers.
