Blood pressure refers to force exerted by blood on the walls of blood vessels as the result of the heart pump. The systolic blood pressure defined as the highest pressure in the arteries when the hearts contracts while the diastolic blood pressure is defined as lowest pressure when the heart relaxes. Blood pressure monitoring devices used to understand the risks of blood pressure and help in management, measurement, and monitoring of the problems of blood pressure.

### **Scope of the Report:**

This report focuses on the Blood Pressure Monitoring Testing in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Increasing incidences of hypertension due to changing lifestyle is the key factor attributing towards the growth of the market over the forecast period.
