Abstracts

The global Blood Tests for Alzheimer's Diagnosis market size is expected to reach \$ 131 million by 2032, rising at a market growth of 8.4% CAGR during the forecast period (2026-2032).

Blood Tests for Alzheimer's Diagnosis refer to diagnostic or biomarker testing methods that analyze Alzheimer's disease-related biomarkers in peripheral blood samples. These tests are designed to support the assessment of amyloid pathology, tau abnormalities, neurodegeneration, and neuroinflammation associated with Alzheimer's disease. Compared with cerebrospinal fluid testing and PET imaging, blood-based tests are less invasive, easier to perform, more accessible, and relatively more cost-effective. They are mainly used for diagnostic support in patients with cognitive impairment, clinical triage, treatment eligibility assessment, disease monitoring, and subject screening in drug development and clinical trials. The average price for end-point testing services is approximately US\$500-900 per test.

The upstream supply chain of Blood Tests for Alzheimer's Diagnosis mainly includes antibodies, recombinant proteins, calibrators, quality controls, magnetic beads, enzyme labels, chemiluminescent substrates, assay raw materials, sample preparation consumables, chemiluminescent platforms, single-molecule immunoassay platforms, mass spectrometry systems, and related algorithms and data analysis software. The midstream segment consists of blood-based diagnostic product and platform companies that develop assays, instruments, and multi-biomarker panels targeting markers such as pTau, A β , NfL, GFAP, and ApoE. The downstream segment includes neurology departments, memory clinics, independent clinical laboratories, specialty testing centers, pharmaceutical companies, CROs, universities, and research institutions, with applications covering clinical diagnostic support, patient stratification, treatment

monitoring, clinical trial enrollment, and Alzheimer's disease biomarker research.

The Blood Tests for Alzheimer's Diagnosis market is entering a critical transition phase from research validation to clinical commercialization. With growing clinical evidence for blood-based biomarkers such as pTau, A β , NfL, and GFAP, and increasing demand for patient screening and stratification driven by anti-amyloid therapies, blood tests are expected to become an important supporting tool in the Alzheimer's disease diagnostic pathway. Compared with PET imaging and cerebrospinal fluid testing, blood-based tests offer clear advantages in convenience, accessibility, and cost efficiency, making them particularly suitable for clinical triage, treatment eligibility assessment, and broader patient pre-screening. Future market growth will be driven by improvements in test accuracy, regulatory progress, physician adoption, laboratory channel expansion, and rising demand from drug development. However, the market still faces challenges related to clinical guideline adoption, reimbursement, assay standardization, and comparability across different technology platforms.

This report studies the global Blood Tests for Alzheimer's Diagnosis demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Blood Tests for Alzheimer's Diagnosis, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Blood Tests for Alzheimer's Diagnosis that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Blood Tests for Alzheimer's Diagnosis total market, 2021-2032, (USD Million)

Global Blood Tests for Alzheimer's Diagnosis total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Blood Tests for Alzheimer's Diagnosis total market, key domestic companies, and share, (USD Million)

Global Blood Tests for Alzheimer's Diagnosis revenue by player, revenue and market share 2021-2026, (USD Million)

Global Blood Tests for Alzheimer's Diagnosis total market by Type, CAGR, 2021-2032, (USD Million)

Global Blood Tests for Alzheimer's Diagnosis total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Blood Tests for Alzheimer's Diagnosis market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Roche, Fujirebio, Sysmex, Shimadzu, Diadem, Quanterix, ALZpath, Beckman Coulter Diagnostics, Siemens Healthineers, Vazyme, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Blood Tests for Alzheimer's Diagnosis market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
