Abstracts

The global Blood Transfusion market size is expected to reach \$ 120 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

Blood Transfusion is generally the process of receiving blood or blood products into one's circulation intravenously. Transfusions are used for various medical conditions to replace lost components of the blood.

In the report, we counted the Blood Transfusion set.

The global blood transfusion sets are mainly produced in Europe, and Europe accounts for more than 40% share of production, followed by North America and China. In China, there are many small scale manufacturers to produce blood transfusion sets, but the Chinese blood transfusion sets product qualities are relatively low, and its products are mainly exported to some developing countries, such as Africa and South America.

This report studies the global Blood Transfusion production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Blood Transfusion and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Blood Transfusion that contribute to its increasing demand across many markets.
