Abstracts

The global Blue Film market size is expected to reach \$ 659 million by 2029, rising at a market growth of 5.6% CAGR during the forecast period (2023-2029).

Both UV film and blue film are commonly used consumables in semiconductor manufacturing processes. The price of UV film is much higher than that of blue film, and UV film is relatively viscous before UV. From a global perspective, leading manufacturers of UV film and blue film are mainly dominated by Japanese manufacturers, such as Nitto Denko, Mitsui Chemicals, Furukawa Electric, Denka, etc. In 2021, the top three companies in the world will account for more than 50% of the market size.

Blue film is a kind of solar spectrum selective absorption coating, which is deposited on the surface of related metals to collect solar energy. It is a new generation of solar energy utilization technology. There are three types of blue film: PVC blue film, PE blue film and PET blue film.

This report studies the global Blue Film production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Blue Film, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
