## Abstracts

According to our (Global Info Research) latest study, the global Bluetooth Signal Tester market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The Bluetooth signal tester is a professional test equipment for Bluetooth communication of electric energy meters. It is an intelligent test equipment that integrates Bluetooth communication performance indicators and Bluetooth communication interconnection functional requirements according to the State Grid's technical requirements for electric energy meters Bluetooth communication.

Traditional energy meter calibration usually uses manual wiring, which is inefficient. Improper operation can cause device damage and pose safety risks. In order to achieve efficient and reliable batch electric meter error verification, low-power Bluetooth technology is now often used to realize wireless verification of electric energy meters. Through research, the Bluetooth normal mode is abandoned and the Bluetooth special mode is adopted. The Bluetooth module forwards signals from the protocol layer to directly forwarding from the bottom register, which greatly improves the stability of signal forwarding. After many experiments and tests, the stability can reach Below 1?s, it can meet the calibration requirements of all current accuracy levels of energy meters. During inspection, there is no need to connect the photoelectric head on the inspection meter body to the optical pulse interface and electrical pulse interface of the meter to be inspected, which reduces manual participation, improves the error inspection efficiency of batch electricity meters, and will also expand the market size of electric energy meters.

The Global Info Research report includes an overview of the development of the Bluetooth Signal Tester industry chain, the market status of Electricity Company (Single Phase Electric Energy Meter Tester, Three-Phase Energy Meter Tester), Electric Energy Meter Manufacturer (Single Phase Electric Energy Meter Tester, Three-Phase Energy Meter Tester), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Bluetooth Signal Tester.
