Abstracts

The global Body Stocking market size is expected to reach \$ 803 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

In 2025, global body stocking production reached 49.6084 million pieces, with an average selling price of \$11.39 per piece.

Body stocking emerged to address the discomfort and functional deficiencies caused by traditional two-piece underwear, such as easy rolling up, uneven warmth, and restricted movement. Since the breakthroughs in synthetic fiber technology and the development of elastic fabrics in the mid-20th century, body stocking has driven innovation in the intimate apparel industry through seamless weaving, high-elasticity fibers, and ergonomic tailoring. Currently, body stocking has evolved into professional gear covering multiple scenarios, including everyday wear, sports protection, medical rehabilitation, fashion styling, and specialized professions.

In terms of production capacity in 2025, Body Stocking's single-line annual capacity is projected to be 1.5-1.7 million units, with an industry average capacity utilization rate of approximately 74%. The gross profit margin is estimated at approximately 14.71%.

The body stocking industry chain exhibits a tiered value distribution: high-cost upstream investment, lean manufacturing midstream, and brand value enhancement downstream. Upstream raw materials and equipment account for 60-70% of costs, with core raw materials including nylon, spandex, cotton/regenerated cellulose, and environmentally friendly dyes and auxiliaries. Downstream brand operation and channel gross profit margins range from 35-55%. International high-end brands, mass-market fashion brands, and functional sportswear brands utilize integrated online and offline

department store counters/specialty stores, covering the daily wear, fashion dresses, medical elastic stockings, and sports and fitness scenarios for women aged 25-45, forming a collaborative ecosystem across the entire chain from raw material technology to end-consumer.
