Abstracts

According to our (Global Info Research) latest study, the global Boiler market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

This report mainly studies industrial boilers. There are two types of industrial boiler products. One is steam, which is used for power generation or gas supply. For example, a chemical fertilizer plant can use steam to vaporize and use coal as a raw material to synthesize chemical fertilizer. This is a typical industrial boiler. Coal-fired boilers still account for the majority, and gas-fired waste heat boilers are generally used to recover waste heat. A common industrial boiler is a circulating fluidized bed boiler. Industrial boilers are important thermal power equipment, and our country is the country that produces and uses the most boilers in the world today.

This report only includes boiler equipment, not engineering service market information.

The major players in China Boiler market include Dongfang Boiler Group Co., Ltd. (DBC), Harbin Boiler, Wuxi Huaguang Boiler, etc. The top 3 players occupy about 45% shares of the whole market. East China and Northeast China are main markets, they occupy about 60% of the whole market. 200MW-500MW is the main type, with a share about 60%. Electricity is the main application, which holds a share about 55%.
