Bolted steel tanks (bolted steel tanks) are tanks made of steel plates and bolted connections, which are widely used for the storage of liquids and granular materials. Unlike welded tanks, bolted tanks use bolted connection technology, which makes the collection and perception of tanks more convenient, and can be quickly built and adjusted on site according to needs. This type of tank is usually made of anti-corrosion treated steel plates, which has enhanced corrosion resistance and pressure resistance and can withstand working pressures in different environments. The design of bolted steel tanks is flexible and can adjust the capacity and size according to different storage needs.
