Abstracts

Bone broth is a soupy preparation of bone and bone cartilage of chicken or beef. Bone broth is consumed due to its versatile nutritional composition and high protein content. The bone broth is slow-cooked for more than half a day to form a uniform broth and its taste is welcomed across all the region. The bone broth is also processed into powder to form an animal protein additive.

SCOPE OF THE REPORT:

This report focuses on the Bone Broth in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The global bone broth market is expected to be driven the growing fortified food and beverage industry and dietary supplement industry. The production of bone broth is cost-effective than other animal protein production and involves the use of by-product meat industry as input which is anticipated to drive manufacturers to invest more into the market making it more sustainable and profitable. Added benefits like the presence of macro and micronutrient in good proportion with a high concentration of protein are expected to drive the consumer towards bone broth products as an alternative to other protein sources resulting in substantial growth over the forecast period.

The worldwide market for Bone Broth is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
