Abstracts

Bone conduction technology is first introduced for hearing aid and military communication purpose. As sound can be conducted to the inner ear through the bone of the skull. This means that the sound waves are bypassing the outer and middle ear (where the eardrum is located) and directly stimulating the inner ear (hearing organ).

Scope of the Report:

This report focuses on the Bone Conduction Headphones in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. On the basis of type, the Bone Conduction Headphones market is segmented into wired type and wireless type. End-users, included in this market are military, hearing aid field, sports and other field.

The Asia Pacific region is estimated to be the key market over the forecast period, owing to the increasing demand for Bone Conduction Headphones in countries such as China, India, and Japan. The availability of low-cost Bone Conduction Headphones from regional manufacturers is impacting the growth of the market positively. Additionally, the availability of affordable Bone Conduction Headphones manufactured by leading players in order to remain competitive has also bolstered the market growth in this region. The growing competition among the third-party e-commerce channels (backed with large pockets venture capitals) is another key factor fueling the industry growth. The worldwide market for Bone Conduction Headphones is expected to grow at a CAGR of roughly 20.7% over the next five years, will reach 500 million US\$ in 2023, from 160 million US\$ in 2017, according to a new GIR (Global Info Research) study.
