Abstracts

The global Book Recycling Service market size is expected to reach \$ 6913 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

Book recycling services target idle books, used books, secondhand textbooks, books discarded by libraries, books in bookstore inventory, surplus books from publishing and wholesale, books donated by individuals, and books donated by institutions. Through processes such as online barcode valuation, ISBN identification, door-to-door or mail-in book collection, offline store buyback, bulk book collection, charitable donation reception, warehousing and sorting, condition grading, disinfection and refurbishment, inventory shelving, repricing, secondary sales, charitable redistribution, or environmentally friendly disposal, books are reintroduced into the reading, trading, donation, or resource recycling system.

From a demand structure perspective, the main demand for book recycling services comes from four scenarios: individual households clearing out unused books, student textbook buybacks and discounted book purchases, library and school inventory disposal, charitable donations, and reading support in low-resource areas. Textbook buybacks are the most price-sensitive, typically relying on ISBN barcode scanning for valuation, quick quotes, free shipping, and timely payment; general used book recycling relies more on category acceptance standards, condition ratings, and resale inventory turnover; library surplus disposal emphasizes bulk logistics, sorting efficiency, revenue sharing, and social responsibility; charitable book donations emphasize sorting, transportation, destination matching, and social impact. With the continued development of the circular economy, low-carbon consumption, secondhand e-commerce, and charitable reading initiatives, book recycling services not only have commercial attributes but also cultural resource redistribution and environmental protection

attributes.

This report studies the global Book Recycling Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Book Recycling Service, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Book Recycling Service that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Book Recycling Service total market, 2021-2032, (USD Million)

Global Book Recycling Service total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Book Recycling Service total market, key domestic companies, and share, (USD Million)

Global Book Recycling Service revenue by player, revenue and market share 2021-2026, (USD Million)

Global Book Recycling Service total market by Type, CAGR, 2021-2032, (USD Million)

Global Book Recycling Service total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Book Recycling Service market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include BOOKOFF GROUP HOLDINGS LIMITED, World of Books Group, Better World Books, ThriftBooks, momox SE, Half Price Books, BookScouter, Powell's Books, RecycLivre, Gibert, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Book Recycling Service market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$

Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
