The global Borescopes market size is expected to reach \$ 1078 million by 2032, rising at a market growth of 4.0% CAGR during the forecast period (2026-2032).

A borescope (occasionally called a boroscope, though this spelling is nonstandard) is an optical device consisting of a rigid or flexible tube with an eyepiece on one end, an objective lens on the other linked together by a relay optical system in between. The optical system in some instances is surrounded by optical fibers used for illumination of the remote object. An internal image of the illuminated object is formed by the objective lens and magnified by the eyepiece which presents it to the viewer's eye.

Global Borescopes key players include Olympus, GE, Karl Storz, SKF, MORITEX, etc. Global top five manufacturers hold a share about 70%. Japan is the largest market, with a share about 40%, followed by Europe, total with a share about 30 percent. In terms of product, Flexible Borescopes is the largest segment, with a share about 90%. And in terms of application, the largest application is Automotive, followed by General Industry, Construction, and Aerospace, etc.
