“Boric acid” is also called as “hydrogen borate”, or “boracic acid”. It is a weak, monobasic used as an antiseptic, insecticide, flame retardant. It exists in colorless crystals or a white powder that dissolves in water.

Scope of the Report

This report focuses on the Boric Acid in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The global demand for insulation materials drives the boric acid market with increase in demand for residential and commercial applications. In addition, rise in building and construction owing to increase in macro-economic factors such as increase in per capita income has triggered the growth of the boric acid market. Furthermore, the rise in demand for boric acid in fiberglass insulation has majorly boosted the market growth, and this trend is expected to continue in the coming years. The growing demand for borate and boron products in the oil and gas sector as a viscosity and Ph modifier is likely to offer the boric acid market with growth opportunities. Furthermore, increase in demand for consumer electronics and glazed ceramics are projected to boost the demand for boric acid. However, the use of boric acid in personal care items is restricted under the European regulations, which have classified it under the category of a carcinogenic compound and this is likely to hinder the market growth. However, the increase in demand as an energy efficient compound coupled with the demand for borosilicate glass in cookware and laboratory applications are likely to create potential growth avenues for the market.

APAC accounted for the maximum market share and will continue to dominate the boric acid market during the forecast period. This increase corresponds to the rising demand for glass and fiberglass from construction and automotive industries in the region. Other

aspects that propel market growth include the growing demand for boric acid in household insecticide products and industrial applications and their benefits as an antiseptic and wood preservative.

The worldwide market for Boric Acid is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
