## Abstracts

The global Boron Fiber Reinforced Composites market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Boron fiber reinforced composite material refers to the composite material with boron fiber as reinforcement. Boron fibers are usually inorganic composite fibers made by depositing boron onto tungsten cores or carbon cores by chemical vapor deposition, with a diameter of 50-315mm, high strength and high modulus, and play a load-bearing role in composite materials. The matrix can be resin or metal, which plays the role of bonding fibers and transmitting stress.
