Abstracts

The global Borosilicate Glass Tubes market size is expected to reach \$ 1855 million by 2032, rising at a market growth of 3.0% CAGR during the forecast period (2026-2032).

Borosilicate glass is a type of glass with silica and boron trioxide. The boric oxide makes the glass resistant to extreme temperatures, and also improves its resistance to chemical corrosion. Borosilicate glass is processed by advanced production technology by heating the glass to make internal glass melting. Borosilicate glass tubes are hollow pieces made of borosilicate glass. There is a high content of silicon and boron in borosilicate glass tubes.

Global Borosilicate Glass Tubes key players include Schott, Corning, Kavalier, Duran, De Dietrich, etc. Global top five players hold a share about 45%.

China is the largest market, with a share about 65%, followed by Europe and North America, having a total share about 30 percent.

In terms of product, High Borosilicate Glass Tubes is the largest segment, with a share about 85%. And in terms of application, the largest application is Solar Energy Tubes, followed by Laboratory Apparatus, Heat Glassware, Chemical Tubes, Pharmaceutical Packaging, etc.

This report studies the global Borosilicate Glass Tubes production, demand, key manufacturers, and key regions.
