According to our (Global Info Research) latest study, the global Borosilicate Tubes market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Borosilicate Tubes are a type of glass with silica and boron trioxide as the main glass-forming constituents. Borosilicate glass tubes are known for having very low coefficients of thermal expansion ($3.3 \times 10^{-6} \text{ K}^{-1}$ at 20°C), making them more resistant to thermal shock than any other common glass. They are used in many applications such as laboratory glassware, lighting applications, solar thermal systems and pharmaceutical packaging.
