Information on the side effects and health benefits of synthetic flavors provided by botanicals and herbal extracts has greatly boosted the market for plant extracts. In addition, due to the growth of R & D activities in the plant extracts market and the popularity of convenience foods, the demand for plant extracts in the food and beverage industry is growing. As consumer awareness of the health benefits of botanicals and herbal extracts continues to increase, demand for various applications, including skin care, health care, functional foods, health foods, and cosmetics, has increased dramatically. In addition, improper use of antibiotics can cause resistance to certain bacterial strains, which can lead to fatal consequences. These conditions have stimulated demand for botanical drugs and supplements. Herbs are gaining more and more popularity as they primarily protect against several infections and are considered a better alternative to existing and emerging drug-resistant (ADR) pathogens.
