Abstracts

According to our (Global Info Research) latest study, the global Bow Tie Fiber market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

It is a highly birefringent or HiBi SAP fiber where the stress across the core is created by the addition of two Bow-Tie shape stress applying parts (SAPs) in the fiber cladding at opposite sides to the core. The exact shape of the bows, their composition and separation to the core can be modified during the manufacturing process, so different levels of birefringence are delivered.
