Abstracts

BPADA, a kind of special monomer, is one of the main raw materials to make high performance PEI.

Scope of the Report:

This report focuses on the BPADA in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The BPADA industry is highly monopolized by SABIC. BPADA is a very important intermediate for SABIC to produce its ULTEM polyetherimide resins. Thus, SABIC is the largest manufacturer of BPADA in the world, holding more than 99% market share. As for other countries, such as China, due to the weak demand, manufacturers engaged in the industry just produce a small amount of BPADA. In fact, they just have some BPADA in stock, preferring production according to orders. Global production of BPADA increased from 11406 MT in 2013 to 14491 MT in 2017. Europe and North America are the major consumption regions of BPADA as SABIC has PEI facilities in the two regions. Demand from other regions is really tiny. The worldwide market for BPADA is expected to grow at a CAGR of roughly 5.6% over the next five years, will reach 230 million US\$ in 2023, from 170 million US\$ in 2017, according to a new GIR (Global Info Research) study.
