Abstracts

The global BPO Business Analytics market size is expected to reach \$ 103710 million by 2032, rising at a market growth of 13.7% CAGR during the forecast period (2026-2032).

BPO (business process outsourcing) is to outsource a special business process to a third-party service provider. BPO (business process outsourcing) provides a series of flexible services and options for redesigning, managing and running specific business functions. In the past, business process outsourcing was considered as a way to reduce labor costs by transferring its operations to low-cost markets. Modern BPOs look for the most appropriate infrastructure and skills from all over the world to design, build and run processes to help optimize the strategic results that enterprises want to achieve for their customers. BPO was originally related to manufacturing, but now it is adopted by other industries such as finance.

The adoption of systems such as ERP, CRM, SCM, and SFA by enterprises and the industrial Internet revolution have led to the generation of large volumes of data. Moreover, with the increased adoption of big data, the use of business analytics has also surged with a greater need to understand data. Data analytics tools and technologies help derive powerful insights and make efficient use of big data. This helps organizations make strategic decisions based on actionable insights for their business activities.

The major players in global BPO Business Analytics market include Accenture, Cognizant, Genpact, IBM, etc. The top 4 players occupy about 50% shares of the global market. North America and Europe are main markets, they occupy about 70% of the global market. HR is the main type, with a share about 20%. BFSI is the main

application, which holds a share about 25%.
