## Abstracts

The global Bracket Above Ground Swimming Pool market size is expected to reach \$ 8919 million by 2032, rising at a market growth of 10.4% CAGR during the forecast period (2026-2032).

The frame-supported above-ground swimming pool is a mobile pool composed of a steel pipe frame and a reinforced polyether ethylene (PE) coated fabric. The main body uses a steel pipe support structure, and the pool body is formed through high-frequency welding and heat sealing, featuring high tear resistance, abrasion resistance, and aging resistance. It can be quickly installed in city squares, resorts, and other venues, eliminating the need for a fixed location.

The upstream industry mainly includes raw material suppliers such as steel and PVC resin, as well as supporting enterprises such as steel pipe processing and PVC fabric production. Fluctuations in raw material prices directly affect production costs. The downstream industry covers resort tourism centers, hotels, amusement parks, and individual consumers, reaching end users through supermarkets, e-commerce platforms, and brand specialty stores. The global average price of frame-supported above-ground swimming pools is \$473 per unit, with sales of approximately 9.12 million units and a global production capacity of approximately 9.8 million units. The industry profit margin reaches 25%.

The global water sports and outdoor equipment market is poised for a future evolution characterized by increased mainstream appeal, technological sophistication, and diversified application scenarios. As sports like paddleboarding and surfing transition from niche to mainstream, families and young consumers are driving the core growth, fueling continued expansion in equipment demand. Products are rapidly moving

towards smart technology, with increasing penetration rates for features such as built-in sensors, NFC anti-counterfeiting chips, and smart goggles. Simultaneously, the application of environmentally friendly and sustainable materials is expanding, with bio-based materials and recyclable fabrics becoming standard features in high-end products. Popular product categories are showing a clear trend towards scenario-specific segmentation, with dedicated equipment emerging for activities like racing, yoga, fishing, and pets. In terms of business models, deep integration of events, training, rentals, and cultural tourism is driving new growth, with club economies and experiential consumption becoming new engines of growth.
