Abstracts

Find out more about the different brain tumor types and treatments, including surgery, radiation therapy and chemotherapy. Treatment options include those described below, such as surgery, radiation therapy, chemotherapy, and targeted therapy. For a low-grade brain tumor, surgery may be the only treatment needed, especially if all of the tumor can be removed. The outlook for a malignant brain tumour depends on things like where it is in the brain, its size, and what grade it is. It can sometimes be cured if caught early on, but a brain tumour often comes back and sometimes it isn't possible to remove it.
