Abstracts

The global Brake Disc market size is expected to reach \$ 15680 million by 2032, rising at a market growth of 8.4% CAGR during the forecast period (2026-2032).

Brake Disc is the component of a disc brake against which the brake pads are applied. The material is typically grey iron, a form of cast iron. The design of the disc varies somewhat. Some are simply solid, but others are hollowed out with fins or vanes joining together the disc's two contact surfaces (usually included as part of a casting process). The weight and power of the vehicle determines the need for ventilated discs. The 'ventilated' disc design helps to dissipate the generated heat and is commonly used on the more-heavily-loaded front discs.

Global Brake Disc key players include Brembo, Winhere, Aisin Seiki, Kiri, etc. Global top four manufacturers hold a share about 35%.

China is the largest market, with a share about 40%, followed by Europe, and United States, both have a share over 35 percent.

In terms of product, Cast Iron is the largest segment, with a share over 95%. And in terms of application, the largest application is Passenger Car, followed by Commercial Vehicle, Motorcycles and Scooters, etc.

This report studies the global Brake Disc production, demand, key manufacturers, and key regions.
