According to our (Global Info Research) latest study, the global Brake Pad Set market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Brake pads are an integral part of the disc braking system. When the brake pedal is pressed, the brake pads press against the running disc in order to stop its motion and brake the vehicle. The brake pads are essentially made of a material that possesses high co-efficient of friction. Increase in demand for efficient braking during high speeds has led to the expansion of brake pad market.

Many consumers are inclined towards the aftermarket replacements of components due to characteristic features and low cost availability. Dual Dynamometer Differential Effectiveness Analysis (D3EA) and Brake Effectiveness Evaluation Procedure (BEEP) are the standards developed in order to ensure the quality of IAM replacements are expected to present potential growth opportunity for automotive brake pads market over the forecast timeframe.
