The global Branch and Wood Shredders market size is expected to reach \$ 5572 million by 2032, rising at a market growth of 7.0% CAGR during the forecast period (2026-2032).

In 2025, global sales of Branch and Wood Shredders reached 1.2 million units, with an average selling price of \$2,800 per unit. A Branch and Wood Shredder is a specialized piece of machinery designed for shredding branches, leaves, wood scraps, and other garden waste; it is widely utilized across sectors such as landscaping, agriculture, forestry, and garden waste management. The equipment employs rotating blades and impact mechanisms to break down larger branches and wood pieces into small particles or wood chips, facilitating subsequent processing, composting, or energy generation through combustion. Depending on specific requirements such as power output, processing capacity, and operating environment, branch and wood chippers are categorized into various types, including push-type, tow-behind, and vehicle-mounted models, all characterized by high efficiency, ease of operation, and eco-friendly features. The upstream raw materials for this equipment primarily consist of high-strength steel, alloy blades, diesel engines, and electric motors; meanwhile, downstream demand is driven mainly by landscaping firms, gardening companies, agricultural waste management enterprises, timber processing plants, and waste disposal facilities. The total production capacity of this market stands at approximately 1.6 million units per year, with the industry maintaining a gross profit margin of around 35%. As global emphasis on environmental protection and waste recycling continues to grow, branch and wood chippers are poised to enjoy sustained market expansion and commercial opportunities within the fields of landscaping, the resource-efficient utilization of agricultural and forestry waste, and waste volume reduction with particularly strong demand anticipated in urban landscaping, comprehensive agricultural

waste utilization, and the broader environmental protection industry.
