Abstracts

According to our (Global Info Research) latest study, the global Brand and Image Strategy Consulting Services market size was valued at US\$ 10549 million in 2025 and is forecast to a readjusted size of US\$ 16600 million by 2032 with a CAGR of 6.6% during review period.

Brand and image strategy consulting is a high-level consulting service that starts from the overall development goals of an enterprise and systematically plans its brand positioning, core values, target audience, and external image. Its focus is not on specific design and execution, but on clarifying "who the brand is, for whom it exists, and how it can be recognized and trusted in the long term." This type of consulting typically covers brand positioning and differentiation strategies, brand architecture and portfolio relationships, core brand narrative, visual and communication principles, and a long-term image management framework. It provides unified and sustainable strategic guidance for subsequent visual design, communication placement, and brand operation, and is a fundamental decision-making process for enterprises when upgrading, reshaping, or expanding internationally.

Driven by intensifying global market competition, rising consumer brand awareness, and the rapid evolution of digital marketing, the demand for strategic consulting services regarding branding and corporate image continues to grow. An increasing number of enterprises view their brand as a core intangible asset, seeking to enhance market competitiveness and brand value through brand positioning, optimization of brand architecture, corporate image upgrades, and brand experience design. Simultaneously, the rise of the digital economy, social media, cross-border e-commerce, and global operations necessitates the establishment of a unified, internationally competitive brand

image to bolster consumer trust and loyalty. Furthermore, activities such as mergers and acquisitions, international expansion, and new brand incubation?alongside the growing prominence of ESG and sustainability principles?are driving an increasing need for brand revitalization, brand governance, and corporate image management. Leveraging new technologies?including consumer insights, big data analytics, artificial intelligence, digital experience design, and brand asset management?strategic consulting in this field is evolving toward data-driven, experience-oriented, digital, and globalized models, thereby fostering the industry's steady development.
