According to our (Global Info Research) latest study, the global Brazzein market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Brazzein is a sweet tasting protein, unlike Miraculin. It is derived from the plant Oubli (*Pentadiplandra brazzeana* Baillon) in West Africa. This protein is found to be 500-2000 times sweeter than sucrose, Miraculin is 400,000 times sweeter. Brazzein is commonly consumed by monkeys, bonobos, and humans and were the first to test its sweet properties. The fruits from the Oubli are sweet tasting alongside the protein and are safe for use for people with diabetes. Brazzein can withstand heat the best which makes it the top protein to use in foods. Unfortunately, it is not considered “Generally Recognized As Safe” by the FDA as of December 2021.
