A roll is a small, often round loaf of bread served as a meal accompaniment (eaten plain or with butter). A roll can be served and eaten whole or cut transversely and dressed with filling between the two halves. Rolls are also commonly used to make sandwiches similar to those produced using slices of bread. They are found in most cuisines all over the world. Among the breads mentioned are griddle cakes, honey-and-oil bread, mushroom-shaped loaves covered in poppy seeds, and the military specialty of rolls baked on a spit.

One of the major factors leading to the growth of the market is the increasing demand for gluten-free products. Gluten can cause inflammation in the small intestine that causes celiac disease, which affects people by causing a digestive problem, severe irritation in the skin, and Aphthous ulcer. Because of such awareness, consumers not only prefer products that are organic but also gluten-free. Companies like King Arthur Flour manufactures gluten-free banana bread with coconut and flax, gluten-free sorghum sandwich bread, etc. to increase their consumer base.
