According to our (Global Info Research) latest study, the global Break Fluid Pressure Sensor market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The brake fluid pressure sensor senses the brake fluid pressure in the hydraulic brake system. The sensor is a pressure switch that can display and warn of faults in the braking system. The brake fluid pressure sensor is used for the anti-lock brake system (ABS). The wheels lock unexpectedly when the ABS system fault light is on, but it may also include insufficient fluid level in the reservoir.

The new accident avoidance technology system also uses the brake fluid pressure sensor.
