Abstracts

The global Break Fluid Pressure Sensor market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The brake fluid pressure sensor senses the brake fluid pressure in the hydraulic brake system. The sensor is a pressure switch that can display and warn of faults in the braking system. The brake fluid pressure sensor is used for the anti-lock brake system (ABS). The wheels lock unexpectedly when the ABS system fault light is on, but it may also include insufficient fluid level in the reservoir.

The new accident avoidance technology system also uses the brake fluid pressure sensor.

This report studies the global Break Fluid Pressure Sensor production, demand, key manufacturers, and key regions.
