## Abstracts

Enhanced consciousness among women about physical appearance is driving the demand for cosmetic surgery and breast augmentation is the most popular cosmetic surgery among various cosmetic procedures. Breast implants are the medical devices that are implanted under the breast to increase the size and provide perfect shape to the breast. Patients being well-informed about the breast implants are opting for small breast implants than the large breast implants. Small breast implants are considered to be more comfortable for athletic and fit look.

### Scope of the Report

This report focuses on the Breast Implant in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Increasing longevity of women along with the desire to look fit and attractive has resulted in a higher demand for the procedure. Growing trend of breast augmentation to maintain body proportion and restores breast volume will stimulate business growth. Rising breast cancer incidence and consequential increase in mastectomy will serve as a high impact rendering factor over the coming years. Events such as early menarche, late natural menopause or not bearing children, increases risk of acquiring the cancer due to increased exposure to estrogen and progesterone. Growing awareness pertaining to availability of restoration option have resulted in greater number of women opting for reconstruction procedures.

The Americas accounted for the maximum market share during 2015 and will continue to dominate the market for the next few years. One of the major factors driving the market's growth in the region is the growing presence of a large aesthetically conscious population.

The worldwide market for Breast Implant is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
