## Abstracts

Breast massage is one of the most adopted methods for reducing breast cancer risk and is increasingly being suggested to patients who have breast cancer. It helps in the circulation of lymph fluid and enhances the immunity of the patients. Massage also improves the flow of blood to the tissues, thereby, leaving them well-nourished and free from blockages.

Scope of the Report:

This report focuses on the Breast Massager in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The growing demand for privacy has escalated the demand for massagers at home. They not only give comfort and a relaxing environment at home but also provide security and privacy to the users. Most people do not feel comfortable in a massage therapist's chamber, particularly with undressing, draping, and being massaged by strangers. People are also wary of scandals such as misconduct and illegal video recordings during the process, which have occurred in the past in many massage centers. A breast massager is developed based on proven massage therapies and it works in the same way as in clinics. It incorporates special mechanisms that slowly apply vibrations on the affected area and provide comfort and benefits. Thus, the demand for portable breast massagers, which can be used in the privacy of one's home is expected to increase during the forecast period and will contribute significantly to the market share.

In 2015, the breast massager market was led by the retail outlets, which is expected to continue its domination over the forecast period. Much of the segment's growth is

attributable to the presence of supermarkets, hypermarkets, convenience stores, and drugstores in urban as well as rural areas, especially in developing regions such as South America, MEA, and APAC. These distribution channels offer increased convenience and comfort to consumers, enabling them to carry out one-stop shopping and brand comparison, besides providing a range of product options. Also, retail outlets have customer care professionals who give advice and suggestions to consumers about the benefits of these products.

The worldwide market for Breast Massager is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
