Abstracts

Working mothers demand for breastfeeding supplies due to the short and limited maternity leaves that reduces the time mothers are able to spend with their babies. As they do not wish to compromise on the nutrition provided to their infants, they use supplies such as breast pumps to pump breastmilk and use milk storage bottles and breast milk bags to store breastmilk and resume work.

Scope of the Report:

This report focuses on the Breastmilk Storage Bags and Bottles in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The surge in the number of working women has led to the need for breastfeeding supplies because maternity leaves are not very long, and new mothers must get back to work soon after giving birth. Thus, these mothers are not able to give their babies enough time. But they do not want to compromise on the nutrition they give to their babies. As a result, they choose breast pumps to pump breastmilk and use breastmilk storage bags and bottles to store breastmilk. This milk can be fed to the child by anyone in the family, thereby proving to be the most vital factor to boost the sales of breastmilk storage bags and bottles.

The Americas was the leading region for the global breastmilk storage bags and bottles market in 2017, accounting for a market share of over 51%. The market share of this region is anticipated to decrease to some extent by 2022. However, the Americas will dominate the market throughout the forecast period.

The worldwide market for Breastmilk Storage Bags and Bottles is expected to grow at a

CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
