## Abstracts

The global Breather Proof Membrane market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Breather membranes are installed to the outer side of the insulation – for example, either over or under the counter-battens on a pitched roof – and allow water vapour to escape from inside a building without the need for ventilation. They also repel any water, most commonly rain, that tries to enter the building.

This report studies the global Breather Proof Membrane production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Breather Proof Membrane, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
