Abstracts

Ion beam is a type of charged particle beam containing of ions. Ion beam technology is an advanced method that is being mainly used for semiconductor industry, and also increasingly tapped in the organic field for the use of ablation & deposition of materials and site-specific analysis. There are many benefits of ion beam technology, such as high run-to-run process repeatability, high surface quality, maximum flexibility, excellent uniformity, minimal scattering and minimal optical losses. Broad ion beams are also used for polishing, conventional ion etching, cutting, thinning and depth profiling.
