Abstracts

The global Brominated Vegetable Oil market size is expected to reach \$ 468.4 million by 2029, rising at a market growth of 5.8% CAGR during the forecast period (2023-2029).

Several types of natural and synthetic food additives are available in the market. They are mainly used to preserve medicines, packaged and fresh foods, and other consumer products. Brominated vegetable oil (BVO) is also used as an additive in several products such as beverages, bakery products and others. The Food and Drug Administration (FDA) formerly considered brominated vegetable oil (BVO) as 'generally recognized as safe'. This decision was reversed after sometime by the agency. Nowadays, under certain situations and on a temporary basis pending more research, the FDA allows brominated vegetable oil to be used as a food additive.

This report studies the global Brominated Vegetable Oil production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Brominated Vegetable Oil, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
