Brushed bricks refer to a type of bricks that have a textured surface achieved through a specific finishing technique. The process involves brushing the surface of the bricks with a stiff wire brush, which helps create a rough texture and remove any loose particles or debris. This technique gives the bricks a slightly weathered or aged appearance. The purpose of brushing bricks is to enhance their visual appeal and provide a unique aesthetic to the finished construction. Brushed bricks are commonly used in architectural designs, both for interior and exterior applications, to add character and create a rustic or vintage look.
