According to our (Global Info Research) latest study, the global Brushless Drills market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Brushless motors have significantly higher efficiency and performance, and a lower susceptibility to mechanical wear than their brushed counterparts. Cordless drills with brushless motors came on the scene just within the last decade and quickly gained ground on traditional brushed models.

Brushless drills are power tools that use a brushless motor instead of a traditional brushed motor. Without brushes to cause friction and slow things down, brushless drills pack more power and torque.
