According to our (Global Info Research) latest study, the global BSA ELISA Kit market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Bovine serum albumin (BSA) is a globulin in bovine serum. Most commercial serum-free culture media are formulated with various biomacromolecules that can replace the function of serum, such as bovine serum albumin (BSA), transferrin and insulin. As a heterologous protein, BSA may produce adverse immune responses in the human body when it exceeds a certain concentration, thus affecting the safety of biological products. Therefore, the detection of BSA residues is used as an important indicator for the quality control of biological products.
