Abstracts

The global Budesonide and Formoterol Fumarate market size is expected to reach \$ 4086 million by 2032, rising at a market growth of 6.6% CAGR during the forecast period (2026-2032).

Budesonide and Formoterol Fumarate is a compound inhalation preparation consisting of budesonide, an inhaled corticosteroid, and formoterol, a long-acting ??-adrenergic agonist. It exerts both anti-inflammatory and bronchodilator effects: budesonide reduces airway inflammation and hyperresponsiveness, while formoterol relaxes bronchial smooth muscle rapidly. It is mainly used for the long-term management and maintenance treatment of asthma and chronic obstructive pulmonary disease (COPD), effectively relieving wheezing and dyspnea, and reducing the risk of acute exacerbations. In 2025, global Budesonide and Formoterol Fumarate production reached approximately 320 million units

Budesonide and formoterol is a core fixed-dose combination inhaled therapy for the global management of asthma and chronic obstructive pulmonary disease (COPD). With its dual mechanism of anti-inflammatory action and bronchodilation, it has long maintained a first-line clinical position. Historically dominated by originator brands, the global market has gradually diversified as patents expired and generic versions entered the market. Domestic and international generics have rapidly gained penetration through cost-effective advantages, driving higher overall market accessibility. On the demand side, rising global prevalence of chronic respiratory diseases, improved standardization of diagnosis and treatment, the implementation of tiered healthcare and chronic disease management policies, as well as consistent guideline recommendations for this combination therapy, collectively support steady market growth. At the same time, the sector faces challenges including intensified generic competition, pricing

pressure, and patient share diversion from novel triple combinations and biological therapies. Overall, thanks to its well-established efficacy and broad indications, the product will continue to see stable market demand, with competition increasingly focusing on product quality, inhaler device optimization, cost control, and expansion in primary care and overseas markets.

This report studies the global Budesonide and Formoterol Fumarate production, demand, key manufacturers, and key regions.
