Abstracts

BIPV are PV materials that are used in place of conventional building materials as an auxiliary source for power. BIPV integrates solar energy with that of building design. They are used in various parts of building envelopes such as roofs, facades, and skylights. BIPV technology can be incorporated either during the construction of a new building or it can be retrofitted to an old building.

Scope of the Report:

This report focuses on the Building Integrated Photovoltaic (BIPV) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The industry is expected to witness high growth as the product is in the growth stage of the product lifecycle and is likely to sustain high growth due to the superior integration of the product coupled with increased adoption of solar energy harnessing systems. However, high initial investment costs coupled with efficiency reduction due to shadowing are likely to restrain the growth. The Building Integrated Photovoltaics (BIPV) market is expected to grow on account of increasing installations of integrated solar energy harnessing systems.
